

AntRep - Getting Started

A plain-English walkthrough for athletes and coaches. Follow the short path for your role, then use the screen guide when you need it.

[Onboarding guide - athlete and coach portals](#)

What's inside

1. **Welcome to AntRep** Everyone
2. **Athlete - your first workout** Athlete
3. **Athlete - screen guide** Athlete
4. **Coach - onboard an athlete** Coach
5. **Coach - screen guide** Coach
6. **Quick answers** Everyone

1. Welcome to AntRep

EVERYONE

AntRep has two connected sides. Athletes train and record results. Coaches build plans, follow progress and communicate with athletes.

Choose the side you need

Use the athlete portal when you are doing your own training. Use the coach portal when you are managing somebody else's training.

One login can have both roles. Settings lets you add the other role or switch between roles without making another account.

Portal	Open it	Use it for
Athlete	Main AntRep address	Today's workout, set logging, plans, coach contact and progress
Coach	Add /coach to the address	Athletes, plan building, assignments, coaching and reports

Sign in or practise first

- 1 Open the portal you want.
- 2 Sign in, or choose Create account and enter your name, email and a password of at least 8 characters.
- 3 If AntRep asks you to confirm your email, open the link in your inbox, return to AntRep and tap I've confirmed it.

In a development or demo setup, Explore the demo opens a ready-made practice workspace. Demo changes stay in that browser and do not affect a real account.

The image shows a mobile app sign-in screen for 'AntRep Coach'. At the top is a cartoon mascot of a bull wearing a cap and holding a clipboard. Below the mascot is the app name 'AntRep Coach' in a bold, white font, followed by the tagline 'Build plans, track every set your athletes log.' in a smaller font. The sign-in section has two buttons: 'Sign in' and 'Create account'. Below these are input fields for 'EMAIL' (containing 'you@example.com') and 'PASSWORD' (with a placeholder 'At least 8 characters'). A large blue 'Sign in' button is positioned below the password field. Underneath is an 'OR' separator, followed by a button that says 'Email me a sign-in link' with an envelope icon. A note below this button states 'No password needed — the link signs you straight in.' At the bottom, there is a 'Demo accounts' section with the text 'No database needed — everything is stored in this browser.' Below this text is a list of three demo accounts, each with a right-pointing arrow icon, a name/role, and an email address: 'Alex Reps · athlete' (athlete@antrep.app), 'Coach Sam · coach' (coach@antrep.app), and 'Priya N · athlete' (priya@antrep.app).

AntRep Coach
Build plans, track every set your athletes log.

No database needed — everything is stored in this browser.

- ▶ **Alex Reps · athlete** athlete@antrep.app
- ▶ **Coach Sam · coach** coach@antrep.app
- ▶ **Priya N · athlete** priya@antrep.app

The real coach sign-in screen, including the ready-made demo accounts and the link back to the athlete portal.

Tip: If the demo button is not shown, the published app is set to real accounts only.

Know when your work is saved

Set values are saved as you enter them. There is no separate Save workout button.

Plan editors and profile forms do have a Save button. Use it before leaving those screens.

2. Athlete - your first workout

ATHLETE

This is the shortest useful route: get a plan, open today, record your sets and check the result.

Step 1 - get something to train

A plan tells AntRep what belongs on each training day. You can sync a plan from a coach or build your own on the Plans tab.

No plan yet? That is okay. Home has Extra work, where you can record any exercise immediately.

- 1 For a coach plan: get the coach's invite code, open Settings, enter it under Coaches and tap Link.
- 2 Open Plans. Under From your coach, tap Sync on the plan you want to follow.
- 3 For your own plan: open Plans, tap New, set the schedule, add exercises and save.

Step 2 - open Home

Home answers one question: what am I doing on this date? The date bar, today's plan and Extra work are all on the same screen.

Tap Another day when you want to do a different scheduled session today. Use the date arrows when you want to write up training on the date it actually happened.

Step 3 - start the session

Tap Start now on the workout card, then choose the mode that matches what you are doing.

Choice	Choose it when
Start workout	You are training now and want the live timer
Start another day	You are moving a different planned day to today

Choice	Choose it when
Just log	You are entering the workout afterwards and do not need a timer

Step 4 - record each set

- 1 Tap the exercise row to open its logging card.
- 2 Use the minus and plus buttons, or tap a number and type the exact value. Decimals such as 52.5 are supported.
- 3 Tap Add set when you need another row.
- 4 Use the tick beside the exercise when it is finished.

The fields fit the exercise: strength uses weight and reps, cardio uses distance and time, and timed work uses seconds. RPE means how hard the set felt; 8 means you probably had about two good reps left.

Tip: An empty set row is not counted until you enter a value.

Step 5 - finish and check it

If you started a timer, stop it when the workout is over. Your set data was already saved while you logged.

Open Progress to see the session in your totals. Use Plans to find the whole session, or Exercises to follow one movement over time.

If you missed a day

What you mean	What to do
Do Tuesday's workout today	Home > Another day > choose Tuesday
Record what I did last Tuesday	Home > date bar > choose Tuesday > log it there
Record something outside the plan	Home > Extra work > Log an exercise

Tip: A past-date entry is labelled as a late log, but it still belongs to that date in your history.

3. Athlete - screen guide

ATHLETE

The six buttons at the bottom stay in the same order. Here is what each one is for.

The athlete navigation

Tab	Use it for
Home	Today's plan, timers, set logging, another day and extra work
Plans	Sync a coach plan, create your own, inspect running and past plans
Coach	Activity, check-ins, notes and trackers with a linked coach
Progress	Streak, XP, totals, trends, plans, training days and exercises
Library	Save exercises and choose how each one should be logged
Settings	Profile goals, appearance, coach linking, guide and account switching

Reading Progress

Overall includes everything you logged. Pick a plan chip to narrow the numbers below to that plan.

Overview gives the quick read. Plans groups complete sessions. Days compares repeating training days. Exercises follows individual movements.

Tip: A flat or empty chart is normal with only one session. Trends become useful after you have repeated the work.

Setting up the Library

Mine contains exercises you saved. Browse all searches the built-in catalogue.

The logging method saved in Mine is reused in plans and Extra work, so fix it here if an exercise asks for the wrong fields.

Working with a coach

Link a coach in Settings with a one-time invite code. The Coach tab then shows your shared activity, weekly check-ins, coach notes and measurement trackers.

To stop the coaching relationship, use Unlink beside that coach in Settings.

4. Coach - onboard an athlete

COACH

The normal coach workflow is invite, build, assign, review and respond.

Step 1 - invite the athlete

- 1 Open Athletes and create an invite code.
- 2 Send the code to the athlete.
- 3 Ask them to enter it in Settings > Coaches before it expires.

Codes are single-use and normally expire after 30 minutes. Unclaimed codes remain visible on the Athletes screen.

Step 2 - build a reusable plan

- 1 Open Plans and tap New.
- 2 Choose a weekly schedule or a repeating multi-day cycle, then set the plan dates.
- 3 Name each day, add exercises and set the target sets, reps, weight, rest, RPE and coaching notes.
- 4 Save the plan.

Tip: A plan can be assigned to several athletes. Editing the coach-owned plan updates what its followers receive.

Step 3 - assign and wait for Sync

- 1 Open Athletes and choose the athlete.
- 2 Open Assign.
- 3 Tap Assign beside the plan.

Waiting means the athlete has not accepted it yet. Synced means it is active in their portal. A finished assignment can be restarted by the coach.

Step 4 - review the athlete

Overview shows this week's completion, useful flags, adherence, totals, records, today's work and recent sessions.

Progress opens the same analytics structure the athlete uses. Coaching contains shared activity, check-ins, coach notes and trackers.

Step 5 - export or import when needed

The share button on the athlete page exports an Excel workbook or a set-by-set CSV. The plus button imports past training from a spreadsheet.

Exports include sessions, individual sets, exercises, check-ins, trackers and coach notes.

5. Coach - screen guide

COACH

The coach portal has five main tabs. Athlete details open from the roster.

The coach navigation

Tab	Use it for
Athletes	Invite codes, roster status and each athlete's detail page
Plans	Create a plan once and assign it to one or more athletes
Exercises	Save prescription defaults for the plan builder
My training	Use an athlete profile for your own training on the same login
Settings	Profile, appearance, guide, role switching and sign out

The four views inside an athlete

View	What it answers
Overview	What needs my attention now?
Progress	What is changing over time?
Assign	What plan have I sent, and is it synced?
Coaching	What have we discussed, measured or checked in?

My training is separate

My training uses your athlete profile. It does not mix your sessions with an athlete you coach.

If it is not enabled yet, AntRep offers to add the athlete role to the same account.

6. Quick answers

EVERYONE

Use this section when you know the result you want but not the screen name.

Where do I go?

I want to...	Go here
Log an unplanned workout	Athlete Home > Extra work
Backfill an old workout	Athlete Home > date bar > choose the old date
Do another planned day today	Athlete Home > Another day
See whether an exercise improved	Athlete Progress > Exercises > choose it
Change the fields used to log an exercise	Athlete Library > Mine > choose it
Link a coach	Athlete Settings > Coaches
Send a plan	Coach Athletes > athlete > Assign
Download an athlete report	Coach Athletes > athlete > share button
Switch roles	Settings > Account

Common words in plain English

Word	What it means
Plan	The schedule and exercise instructions you intend to follow
Session	One workout on one date
Set	One recorded round of an exercise
Volume	Weight multiplied by repetitions, added together
RPE	Effort from 1 to 10; 8 is roughly two good reps left
Adherence	How much of the planned training was actually completed
Late log	Training entered on a past date
Extra work	Training recorded outside a plan

When something looks wrong

Nothing appears on Home: check that a plan is synced, active and has started. You can still use Extra work.

An exercise asks for the wrong values: edit its logging method in Library > Mine.

A chart is empty: log the exercise or session at least twice so AntRep has two points to compare.

A coach plan says Waiting: the athlete still needs to tap Sync on Plans.

An invite code fails: it may be expired or already used. Ask the coach to create a fresh one.

A real account is blocked after sign-up: confirm the email address, return to AntRep and tap I've confirmed it.

The Saved state in the real logger confirms continuous saving while set values are entered.
